6. RESULTS ANNEXES FOR PROJECTS COMPLETED BETWEEN JULY 2015 AND JUNE 2016

Annex 6.1: Methodological basis for the report on selected results

This annex describes the methodological basis on which the chapter on selected results (Chapter 2) has been drawn up, in accordance with guidelines set out in the European Commission's Staff Working Document 'Launching the EU International Cooperation and Development Results Framework'¹ (the EU Results Framework). As explained in the SWD, the term results in this Report covers outputs, outcomes and impacts in line with the definition of the Organisation for Economic Co-operation and Development's Development Assistance Committee (OECD DAC).

Outputs are the products, capital goods and services which result from a development intervention; they may also include changes resulting from the intervention which are relevant to the achievement of the outcomes.

Outcomes are the likely or achieved short-term and medium-term effects of an intervention's outputs.

Impacts are the primary and secondary long-term effects produced by a development intervention, either directly or indirectly.

Chapter 2.1 of this report: Development progress in partner countries, the context for EU contributions to progress

Coverage: The countries included in the (regional) averages for Chapter 2.1 of this report are the partner countries in which the EU is financing bilateral programmes in the 2014-2020 programming period².

Data sources: The statistics used to report on the indicators in Chapter 2.1 were taken from international statistical sources (presented in Table 17 below) and in the majority of cases refer to 2014, 2015 and 2016; the latest available data for the predefined indicators at the time the publication was being compiled³.

Updates of previous values: A number of values from previous years (as of 2014 and as of 2015) have been updated to ensure comparability. They are marked *. There are several reasons for these updates:

- The revision of the international poverty line from USD 1.25 to USD 1.90 affected two indicators:
 - o Proportion of population living below the international poverty line
 - o Proportion of employed people living below the international poverty line
- Retroactive adjustment of data sets and estimated values affected seven indicators:
 - o Number of violent deaths per 100 000
 - o CO2 equivalent emission (kilo tons)
 - o Proportion of population living below the international poverty line
 - o Under-fives mortality rate
 - o Maternal mortality ratio
 - o HIV prevalence among population aged 15-24 years

² Funded from the following funding instruments: the European Development Fund (EDF), the Instrument for Development Cooperation (DCI), the European Neighbourhood Instrument (ENI), and the Instrument for Greenland

³ November 2016

- Prevalence of undernourishment
- New data source: for the renewable energy production indicator, the previous data set from World Bank was discontinued, and a new source was selected. The value as of 2014 was updated with data from the new source to ensure the continuity of data over time

Values were updated with data available as of November 2016, according to the data points used in the original calculations.

Methodologies for EU RF indicators: Detailed information on data sources and calculations for each of the indicators can be found in the methodological notes provided for each indicator, at <http://capacity4dev.ec.europa.eu/eu-rfi>

Presentation: Percentages are rounded to the nearest one decimal point.

Chapter 2.2 of this report: Partner country results supported by the EU

Coverage: Chapter 2.2 of this report draws on the results of all projects and programmes which ended between 1 July 2015 and 30 June 2016 and were funded by the EU for an amount of more than EUR 750 000. As was indicated in the Commission's Staff Working Document, this was done in order to make the data collection, processing and reporting manageable at this first stage, concentrating on those projects and programmes where the focus of EU project/programme performance lies. As was also stated in the SWD, these represent some 90-95 % of the total financial amount of the portfolio of projects and programmes ending in each year. Thus, the report does not include results from the many smaller projects funded by the EU during that period. So, the results reported cannot be interpreted as providing a full picture of the results of the projects and programmes financed by the EU in the countries concerned.

There is a difference between the countries included in Chapter 2.1 on development progress and those included in Chapter 2.2 under partner country results supported by the EU. The countries in Chapter 2.2 reporting against EU Results Framework level 2 indicators are those for which the results reported are from projects and programmes that finished between mid-2015 and mid-2016.

Chapter 2.2 reports results against the EU Results Framework level 2 indicators, aggregating results from the projects and programmes mentioned.

Data sources: The information on results in this section has been drawn from the reports of EU implementing partners (i.e. partner countries, international organisations, EU Member States' development agencies, international financial institutions and NGOs). In turn, these organisations use data collected from a variety of sources, such as management information systems held by development country governments, individual project monitoring set up by implementing partners, or representative sample surveys.

Methodology notes for EU Results Framework indicators: In order to ensure that data from the various reporting sources could be aggregated consistently across the different projects and programmes, methodological notes were established for each EU Results Framework indicator. These provide definitions and data sources clearly explaining what type of interventions should be included when reporting against an indicator. The notes can be found at <http://capacity4dev.ec.europa.eu/eu-rfi>.

A common feature of all level 2 indicators is that the results reported have been calculated using a contribution approach. This means that where a project has been financed by the EU jointly with other funders, for example partner-country governments or other donors, the overall results of the collective effort are reported, rather than those linked to the share of funding provided by the EU.

Sex-disaggregation: The SWD mentioned that where possible, results would be sex-disaggregated. These results are presented in Annex 6.7 below. Where that disaggregation has not been provided it is either because it was not relevant for the indicator in question (for example, Total length of road constructed/rehabilitated/maintained (km)); or because the data was not available for the project/programme in question.

Presentation: The results estimates have been rounded using the following regime:

- Estimates of 10 000 or more – rounded to the nearest 1 000
- Estimates between 1 000 and 10 000 – rounded to the nearest 100
- Estimates between 100 and 1 000 – rounded to the nearest 10
- Estimates that are less than 100 – no rounding.

Accuracy: As part of the preparations for the report, an extensive quality assurance process was put in place for the results data to minimise the source of any errors. The type of errors the EU has attempted to minimise includes:

- Ensuring that the results reported are from reliable data sources
- Ensuring that the link between results from individual projects and programmes and EU RF indicators are robust
- Double counting: all programmes are quality assured to help minimise double counting of individuals who have benefitted from the same intervention over different years, and/or different interventions ending in the same year. In addition, double counting of individuals between projects/programmes ending in different years were also assessed and any duplication removed for cumulative total numbers of beneficiaries across all years for the following indicators:
 - Number of countries where overall public financial management has improved
 - Number of children enrolled in primary education
 - Number of children enrolled in secondary education
 - Number of women using any method of contraception
 - Number of countries/regions with climate change strategies either being developed and/or implemented with EU support
 - Number of countries whose capacity to trade across borders has improved
 - Number of countries where the business environment has improved

However, given the range of underlying data sources used, the accuracy of the results data may still vary.

7. FINANCIAL ANNEXES

7.1. Introduction to financial tables

This Annual Report provides an overview of policies, objectives and achievements in 2016. The tables and graphs which follow present the main data on EU development assistance in 2016 by country, region, sector and instruments. For the first time this year, the financial annexes present data on the implementation of the European Union Trust Funds (tables TF1 to TF5).

The legal and financial basis of EU development assistance is composed of a number of instruments, which can be geographic (targeting a group of countries) or thematic (targeting a specific development issue). The geographic cooperation with the African, Caribbean and Pacific (ACP) countries, is based on the Partnership Agreement with the ACP signatory states and is mainly financed, South Africa excepted, by the European Development Fund (EDF) which is separate from the EU budget. External assistance for other geographic areas and the thematic programmes with worldwide coverage are financed from the general EU budget under different instruments such as Development and Cooperation Instrument (DCI) or the European Neighbourhood Instrument (ENI).

Whenever references are made in the following tables to the 'EU budget', this refers to the budget managed by the European Commission and does not cover EU Member States' national budgets for development assistance.

The reporting dimensions used in the financial annexes of the Annual Report are compliant with international standards as defined by OECD's Development Assistance Committee (DAC):

- The concept of Official Development Assistance (ODA) used throughout the tables and figures is defined by the OECD DAC. Not all EU external assistance can be reported as ODA. Whether a project is classified as ODA depends on the eligibility of the recipient country and the purpose and contents of the project.
- The definition of "region" reflects the country groupings used by OECD DAC for reference and does not always coincide with the country groupings used in the European Commission instruments. The granularity level of some of the tables allow for a breakdown by country and instrument for analytical purposes.
- The grouping of ODA-eligible countries in three income groups (Less Developed Countries or LDCs; Lower Middle-Income Countries or LMICs; Upper Middle-Income Countries or UMICs) is a dimension widely used by OECD DAC and other international organisations. It is based on Gross National Income (GNI) per capita calculations.
- The activity sectors used in the tables are those used by OECD DAC for sectoral ventilation (DAC purpose codes).

The tables presented in this report have been reorganised and the layout improved since the 2016 report on 2015 data. The relationship between the current structure of the financial annexes and those in Annual Reports prior to 2016 is presented in Annex 7.21 and a list of abbreviations used in these annexes is given in Annex 7.22. The continuity of the historical statistical series is guaranteed.

At the top of every table in the financial annexes, there is a small box that references the three key financial dimensions of the report: whether the figures in the table are Commitments or Disbursements (C or D respectively); whether only Official Development Assistance (ODA) figures are included, or non-ODA

figures are included as well (Y or N, depending); which of the EDF, the DEVCO (Directorate-General for Development and Cooperation) budget lines, and the non-DEVCO budget lines (including Directorate-General for Neighbourhood and Enlargement Negotiations) are included (Y or N, depending).

Annex 7.1 shows the importance of external assistance in the overall expenditure of the European Commission. Defined as the resources used to foster programmes and projects outside the EU, external assistance accounted for 11 % of the total allocation in 2016.

Annex 7.2 provides a breakdown between ODA and non-ODA by Directorate-General.

Annexes 7.3 and 7.4 provide detailed breakdowns of the budget by managing entity and instrument.

Annex 7.5 presents a summary of the European Development Fund for 2016.

Annexes 7.6 gives a sectoral breakdown of ODA by Directorate-General.

Annexes 7.7 gives a breakdown of European Commission external aid by country.

Annex 7.8 shows the distribution of ODA by OECD sector and different country groupings, including the country income level group.

Annexes 7.9 combines a view of ODA by sector and by country.

Annexes 7.10 and 7.11 provide a sectoral breakdown by OECD DAC region for DEVCO and non-DEVCO ODA respectively.

Annexes 7.12 combines a breakdown by sector and by EC instrument.

Annexes 7.13 provides a breakdown by country and instrument

Annex 7.14 introduces a breakdown by aid mechanism (project approach, sectoral budget support or general budget support) combined with instruments.

Annex 7.15 looks at sources of external assistance over the past five years.

Annexes 7.16 to 7.19 provide a historical perspective (last five years) for the sectoral breakdown, the regional distribution of aid, the breakdown by income group and the breakdown by aid mechanism.

Annex 7.20 provides data on transfer agreements to the European Commission, i.e. earmarked funds that have been transferred to the Commission by other countries for specific projects and are recorded as part of the EDF and budget accounts.

Annexes TF1 to TF5 provide information on the implementation of EU Trust Funds. EU Trust Funds are new development tools that pool together resources from different donors (including the European Commission) in order to enable a quick, flexible, and collective EU response to the different dimensions of a situation requiring an urgent response.

As of 2016, three EU Trust Funds are active: TF Africa (fostering stability and assisting a broad group of countries across the African continent), TF Bêkou (addressing the crisis in Central Africa) and EU Regional Trust Fund in Response to the Syrian Crisis (addressing the consequences of the Syrian crisis).

It should be noted that EU Trust Funds are specific instruments with their own accounts and financial management. As a result, it is not possible to consolidate the accounts of the EU Trust Funds with the accounts of the EDF and the EU Budget. The tables TF 1 to TF 5 provide some information on the financial implementation of the EU Trust Funds in a way that is consistent with international OECD standards.

Annex TF 1 shows the contributions to the Trust Funds, both for 2016 and during previous years.

Annexes TF 2 to TF 5 give the breakdown of the expenditure realised by the active Trust Funds.
